

Our company is **Ravenol South Africa**.

Ravenol is a German based, family operated oil company (Ravensberger Schmierstoffvertrieb GmbH) that has been in operation since 1946. Ravenol is widely regarded as a world leader in automotive lubrication and is arguably one of the best lubrication brands in the world. We also have a growing reputation here in South Africa.

Ravenol's mission of being Forever Faster is also a guiding principle for the company expressed through all its actions and decisions. "Our objective is to be fast in reacting to new developments in automotive technology, fast in bringing new innovations to the market, fast in decision making and fast in solving problems for our partners." Demonstrated by recently becoming the first to have an API approved 0w/16 low viscosity motor oil. The Ravenol South Africa Team backs the quality of Ravenol products with unrivalled technical expertise stemming from 25 years of experience in the oil industry.

25 years ago there was one ATF, Dexron II. Now, nearly every manufacturer uses their own product. Ravenol have 42 automatic transmission fluids, all with different co-efficient's of friction. In automatic transmissions the frictional characteristics of the automatic transmission fluid must be matched to the friction material used in the gear engagement clutches and/or bands. **There is no such thing as a universal ATF and ATF cannot be up-treated by adding additives.**

The same can be said about antifreeze. Where before we had one antifreeze, Ravenol now have 22 different antifreezes. Some coolants include silicates and are amine and phosphate free, some coolants are silicate, borate and nitrite free and others are amine and silicate free. Using the incorrect coolant can cause head gasket and water pump failure, holes in Welsh plugs, damaged cylinder liner seals, cylinder head cracks and holes, softening of coolant hoses and can cause radiator heater cores and other cooling system parts to be eaten away. This to name only a few. **There is no such thing as a universal antifreeze/coolant.**

The business of servicing vehicles has become far more complicated over the past 10 years and it is going to become a lot more complicated in the near future. For those workshops that want to keep up with this new technology, embrace and benefit from it, partnering with Ravenol makes very good sense.

Ravenol products offer an alternative to buying from the dealer for specialist lubricants. Using Ravenol products means the customer receives the OEM approved fluids for their vehicle thereby maintaining its reliability, safety and value. At the same time, the workshop that supplies Ravenol can make big profits on fluids, before even doing any work on the vehicle. Ravenol products cost less for the same OEM approved product, whether it is engine oil, manual or automatic transmission fluid, antifreeze, brake fluid, differential or transfer case oil.

RAVENOL HAVE MORE OEM APPROVALS THAN ANY OTHER OIL COMPANY IN THE WORLD

These include:

- **20** Synthetic Motor Oils for Passenger Cars
- **42** Automatic Transmission Fluids
- **24** Gear Oils for Manual Transmissions
- **5** Power Steering Fluids
- **22** Anti-Freeze/Coolants

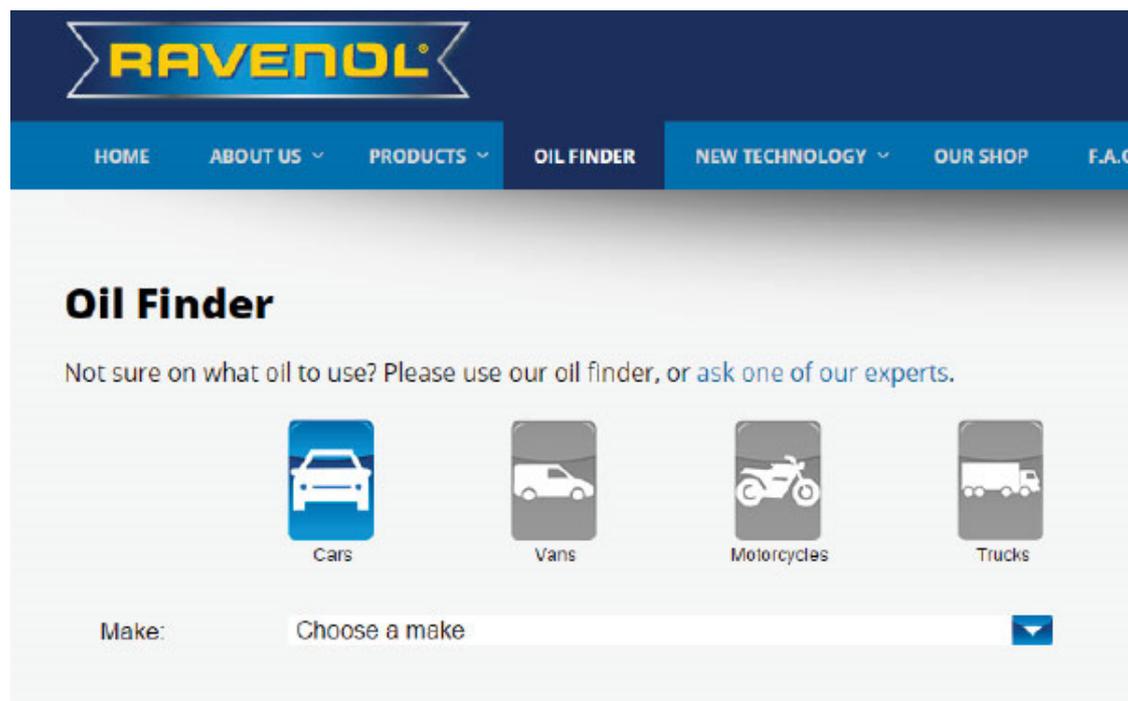

This gives us the single biggest range of automotive lubricants and makes us the obvious alternative to automotive dealers/agents when workshops require “special” lubricants.

Not only do our oils contain the exact part numbers (and thereby won't affect vehicle warranties) our prices are much, much lower. Depending on the product we can be several hundred rands cheaper per litre. This saving can be passed on to clients or can be used to boost profits for the workshop.

Our synthetic oils are true fully synthetic PAO motor oils, not hydrocracked synthetic technology oils.

FINDING THE CORRECT OIL IS EASIER THAN EVER

Our oil finder (www.ravenol.co.za/oil-finder/) takes the hassle out of finding the correct oil for any vehicle. Please see the attachment for a sample print-out of a Honda S 2000.

It's not just oil

We are Ravenol South Africa, your oil industry partner!

The vehicle specs you need

With over 10 000 cars, vans, motorbikes and trucks listed, the Ravenol Oil Finder is the first place to go to when looking for the correct oil to use in any vehicle.

www.ravenol.co.za/oil-finder/

In your web browser, browse to www.ravenol.co.za/oil-finder/. Then select the type of vehicle and then select the make, model and type of vehicle. DONE.

You can then print the specifications for easy reference.

Category : Cars
Make : Honda
Model : S2000 (1999 - 2010)
Type : S2000 (1999 - 2010)

Engine FC20C1/FC20C2

Capacity : Capacity 4,8 liter Service fill
 Capacity 5,9 liter Dry fill
 Filter 0,3 liter

Use : Normal
Intervals : Change 15000 km / 12 months
Products : RAVENOL TSJ SAE 10W-30
 RAVENOL HCL SAE 5W-30
 RAVENOL HLS SAE 5W-30

Use : Severe
Intervals : Change 7500 km / 6 months
Products : RAVENOL TSJ SAE 10W-30
 RAVENOL HCL SAE 5W-30
 RAVENOL HLS SAE 5W-30

Differential, rear

Capacity : Capacity 0,74 liter Service fill
 Capacity 0,77 liter Dry fill

Use : Normal
Intervals : Change 45000 km / 36 months
Products : RAVENOL Getriebeöl EPX SAE 90

Use : Severe
Intervals : Change 30000 km / 24 months
Products : RAVENOL Getriebeöl EPX SAE 90

Transmission, manual 6MT 6/1

Capacity : Capacity 1,48 liter Service fill
 Capacity 1,62 liter Dry fill

Use : Normal
Intervals : Check 60000 km / 48 months
 Change 120000 km / 96 months
Products : RAVENOL MTF-2 SAE 75W-80

Use : Severe
Intervals : Change 60000 km / 48 months
Products : RAVENOL MTF-2 SAE 75W-80

Hydraulic brake/clutch system

Use : Normal
Intervals : Change 36 months
Products : RAVENOL DOT 4

Cooling system

Capacity : Capacity 6,5 liter

Use : Normal
Intervals : Change 75000 km / 60 months
Products : RAVENOL TTC Traditional Technology Coolant Protect C 11 Premix -40°C
